The Art Institute of California—Hollywood, a campus of Argosy University

This sheet includes two charts relating to certain graduates from The Art Institute of California—Hollywood, a campus of Argosy University, during the period of July 1, 2015 through June 30, 2016. The first chart shows graduation data using one of the Department of Education’s formulas for calculating graduation rates.

The second shows data regarding job placement, median earnings, cost of attendance, and total debt. This data relates to graduates who (i) were available for employment; (ii) found work within their field of study within six months of graduation; and (iii) met our employment and verification requirements for Permanent, Temporary, Continuing Employment Held Prior to Enrollment, or Self-Employed/Freelance positions. A more detailed explanation of those who are excluded from consideration and our employment and verification requirements are described in more detail below and in the footnotes for the job placement chart. We measure the six-month period starting at the beginning of the first full month after a student graduates or obtains required licensure/certification required for employment. A graduate must work a minimum of 30 (thirty) days in order to be included in our statistics.

The Career Services department at the campus attempts to contact each graduate in order to obtain details regarding their employment status, including the employer name, employer contact information, job title, and job description. The data received is verified internally, either by obtaining an attestation from the graduate or from the employer. Graduates who do not respond or whose data cannot be internally verified are not counted for placement purposes. A third-party then attempts to verify the collected information by again contacting the graduate and/or employer. The final placement results are then published here.

~ The Graduation Rates component collects data on the IPEDS calculated Fall 2010 cohort of first-time, full-time, degree/certificate-seeking undergraduates (FTFT) and tracks them for 150% of the normal time of their program to see how many complete.

~ Once a student is in the cohort, they remain in the cohort, even if they switch to part-time or drop out (except for exclusions, which include the death of a student, permanent disability, military deployment, or an official church mission).

The Art Institute of California—Hollywood, a campus of Argosy University's job placement rate is derived from students who graduated from their program of study and found work within their field of study within six months of graduation. The graduation rate computes the percentage of first time, full time students who enrolled in a particular degree type who graduated within 150% of the published length of time expected to complete the program. Prospective students should consider both the graduation rate and the placement rate because the placement information does not include students who enrolled but did not complete their program of study.

The placement statistics shown above use a different disclosure period and employment waivers than the employment statistics available in the gainful employment disclosures, which are based on calculations determined by national, programmatic or state accreditation agencies, if required. You should review and consider both statistics when analyzing employment outcomes for programs in which you are interested.

(1) Graduates who are unavailable for employment are excluded when calculating the percentage above. A graduate who is unavailable for employment is one who is unable to work for at least three months due to one of the following factors: a medical condition or disability that results in the inability to work; a parent, child, or spouse who has a medical condition that requires care from the graduate; engagement in full time active military duty; graduate is a spouse or dependent of military personnel who have moved due to military transfer orders; incarceration; death; enrollment for at least half-time in an additional program of post-secondary education; not eligible for placement in the United States because of visa restrictions; OR participation in an established employer educational assistance program; (includes employees of Education Management Corporation or one of its subsidiaries).

(2) A graduate is considered employed if the position is obtained within six months of graduation and is in a related field of study, paid, permanent or it is a temporary position that graduate expects to maintain for a minimum of 180 days, requires at least 20 work hours per week, and is verified after 30 days of employment. Graduates continuing in a position held prior to enrolling are included if they meet the requirements stated above and completing the program enabled the graduate to maintain the position, earn a promotion, or an increase in pay as a result of completing the program. Additionally, for freelance or self-employed graduates, the employment must be in a related field of study, and the graduate has either: 1) completed at least 135 hours of work and/or hours of developing their business and received compensation of at least $3,000 over a period of 90 days; or 2) received compensation of at least $4,500 over a period of 90 days.

A position is considered in a related field of study if: 1) the job title is listed on the Department of Labor’s O*NET Crosswalk for the program CIP (Classification of Instructional Program) or listed as a Lay Title on the O*NET Code Connector with a matching job description; or 2) if the position requires the graduate to use their program’s core skills during the majority of the time while at work and either a) the position held requires education beyond a high school diploma, b) is one of a supervisor or manager, or c) the graduate or their employer certified in writing that the education provided a benefit or advantage in obtaining the position.

(3) The median earnings are calculated by the Social Security Administration using calendar year 2014 Social Security earnings and include the earnings of all graduates from the program who received federal student aid (Title IV) to finance their education. The median earnings represent the amounts earned at the midpoint of all of the graduates in the reporting period for that program. If no median earnings amount is displayed, there are no graduates for that program or the program was not evaluated by the Department of Education.

(4) Program is no longer offered to new students.

* Total Program Cost includes the cost per credit multiplied by the total number of credits for the program plus all applicable fees, books, digital resources and supplies.

** This is the amount of median federal debt for students who graduated from July 1, 2014 through June 30, 2015, as displayed on the gainful employment disclosure. Federal regulations require this amount to be calculated using all locations that share a federal financial aid school code, which is all of the Art Institutes schools in California.

*** This is the amount of median total debt for students who graduated from July 1, 2014 through June 30, 2015.

Information was prepared as of 3/30/2017.

See aiprograms.info for program duration, tuition, fees and other costs, median debt, salary data, alumni success, and other important info.
