

## South University, Novi

The Career Services department at the campus attempts to contact each graduate in order to obtain details regarding their employment status, including the employer name, employer contact information, job title, and job description. The data received is verified internally, either by obtaining an attestation from the graduate or from the employer. Graduates who do not respond or whose data cannot be internally verified are not counted for placement purposes. The final placement results are then published here.

This chart shows employment statistics for graduates from South University, Novi, during the period of July 1, 2016 through June 30, 2017. For more information on the data below, or how the statistics were calculated, please see the information below the chart.

Program Name	Graduates	Graduates Unavailable for Employment Within Six Months of Graduation (1)	Graduates Available for Employment Within Six Months of Graduation (2)	Number of Graduates Employed	Percentage of Available Graduates Employed in Related Field	2015 Median Earnings (3)
<b>Associate of Science</b>						
Physical Therapist Assistant	22	0	22	17	77%	\$48,080.00
<b>Bachelor of Science in Nursing</b>						
Nursing	18	1	17	12	71%	\$64,916.00
Nursing RN to BSN Degree Completion	43	3	40	21	53%	\$64,916.00
<b>Master of Science in Nursing</b>						
Nursing with a specialization in Family Nurse Practitioner	65	1	64	46	72%	
<b>RN to Master of Science in Nursing</b>						
RN to Master of Science in Nursing with a specialization in Family Nurse Practitioner	11	0	11	9	82%	

Included in the data above are graduates available for employment, who are working in a field related to their program of study within six months of graduation, and who have met our employment and verification requirements. These employments include permanent, temporary, freelance, and self-employed statuses, as well as employments that began before enrollment in a program. A graduate must work a minimum of 30 (thirty) days in order to be included in our statistics.

(1) Graduates who are unavailable for employment are excluded when calculating the percentage above. A graduate who is unavailable for employment is one who is unable to work for at least three months due to one of the following factors: a medical condition or disability that results in the inability to work; a parent, child, or spouse who has a medical condition that requires care from the graduate; engagement in full time active military duty; graduate is a spouse or dependent of military personnel who have moved due to military transfer orders; incarceration; death; enrollment for at least half-time in an additional program of post-secondary education; not eligible for placement in the United States because of visa restrictions; OR participation in an established employer educational assistance program; (includes employees of Dream Center Education Holdings, LLC or one of its subsidiaries).

(2) Graduates Available for Employment within six months of the later of (i) the end of the month, in which the Student becomes a Graduate/Completer; or (ii) if a license or certification is required for the relevant occupation in which case, the six months begin on the date on which the results of the first licensing or certification exam for which the Graduate/Completer was eligible to sit become available.

(3) The median earnings are calculated by the Social Security Administration using calendar year 2015 Social Security earnings and include the earnings of all graduates from the program who received federal student aid (Title IV) to finance their education. The median earnings represent the amounts earned at the midpoint of all of the graduates in the reporting period for that program. If no median earnings amount is displayed, there are no graduates for that program or the program was not evaluated by the Department of Education.

The above chart does not display programs that are no longer actively enrolling students, programs with less than ten (10) graduates or that had no graduates during the reporting period, or programs that are not required to report employment data by a national, programmatic, or state accreditation agency.

The placement statistics shown above may use a different disclosure period and employment waivers than the employment statistics available in the gainful employment disclosures, which are based on calculations determined by national, programmatic or state accreditation agencies, if required. You should review and consider both statistics when analyzing employment outcomes for programs in which you are interested.
