**Professional Mental Health Counseling**

*Clinical Mental Health Counseling graduates may qualify to become a licensed counselor in their state by meeting the state guidelines for licensure in that state. Each state has different requirements, with most requiring a minimum of two years of practice and achievement of a successful passing score on a national licensing exam (i.e., National Counselor Examination (NCE) or National Clinical Mental Health Counseling Examination (NCMHCE)). Please note that in most states you can begin working as a counselor without becoming a licensed counselor as licensure is not always a requirement for employment. Unless it is required by the employing agency, licensure is considered voluntary. Licensure pass rates are not automatically reported to the institution from which a student graduates.*
